

## **Activity:**

### **Cybersecurity documents in the company**

In this activity we will look for the documents that a company prepares for the implementation and maintenance of cybersecurity.

Search for information on different websites about the cybersecurity documents that may exist in a company.

Classifies and details these documents in a document/work and outlines which areas or departments they would be related to.

You can accompany/complement the work with hyperlinks to examples of these documents.

Deliver the final result in a document in PDF format, with metadata about the work, and electronically signed.

And don't forget to follow the instructions in the Aules document "How to do class assignment"  
Don't forget to do the work with all the main points.

Cover,

Index (automatic),

Introduction,

Development,

Conclusion and

Webgraphy.
