

Activity: SIEM Elastic Stack

Activity

Task preparation

- Virtual Machine with KUBUNTU distribution 60GB Hard Disk 8 GB RAM

Installation order

Install the Elastic Stack products you want to use in the following order:

1. Elasticsearch ([install instructions](#)) Install Elasticsearch with Debian Package
2. Kibana ([install](#)) Install Kibana with Debian package
3. Logstash ([install](#)) Installing from Package Repositories - We also have repositories available for APT and YUM based distributions

Document the entire process in pdf format. Sign it with your digital certificate.
