

## Activity: OSINT REPORT

Open Source INTelligence. It is the process of researching public data online, to see how much information can be obtained about resources such as the IP address of a computer, a company or even a person.

What is an OSINT report and how can it be carried out?

### Activity

1. Find information on what is and how to prepare an OSINT report
2. See the attached picture
3. Performs an OSINT search and finds out where the photo was taken
4. Gives the data in gps coordinates
5. Prepare an OSINT report to describe the steps followed to obtain the result.
6. What is the subsequent history of the object in the photo?

Deliver both a paper on osint reports and the osint report on the attached image.

Document the entire process in pdf format. Sign it with your digital certificate.
