

UNIT 05

Cyber incidents notification

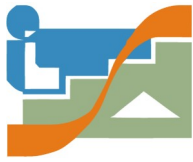

- **Compliance**
- **Develop action procedures for incident notification**
- **Internal incident notification**
- **Notification of incidents to whom it corresponds**

- **Compliance**
- **Develop action procedures for incident notification**
- **Internal incident notification**
- **Notification of incidents to whom it corresponds**

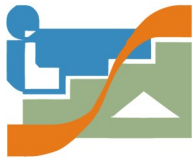

Compliance

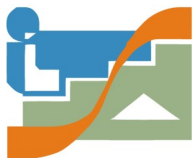

Compliance is a set of procedures and basic practices adopted by organizations to identify and classify the operational and legal risks they face and establish internal mechanisms for prevention, management, control and reaction in the face of these issues.

Summary: Crime prevention system and regulatory compliance

<https://www.ealde.es/tipos-compliance/>

- Compliance
- **Develop action procedures for incident notification**
- Internal incident notification
- Notification of incidents to whom it corresponds

Develop action procedures for incident notification

In the words of the CCN-CERT, "Notification of incidents is key to national security"

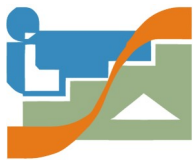

- Create communication channels (internal to the organization)
- Securing and making these channels more reliable
- Promote and inform all potential recipients
- Train and prepare the active users of the channels
- Do tests

Communication channels such as email and the intranet are **not** reliable ways of informing employees.

Use specially designed software that can provide information to everyone quickly, in real time

spanish-national-guidelines-reporting-and-managing-cyber-incidents

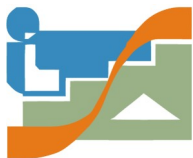

It is important to have a communication plan for incident response !!

Develop action procedures for incident notification

In the words of the CCN-CERT, "Notification of incidents is key to national security"

- Other methods of communicating with employees should be determined (backup chanel), e.g. SMS, phone calls, landline phones
- Communicate regularly, but don't overdo it
- Prepare templates in advance
- Be transparent in your communications
- Send communications to the right audiences (depending the incident)
- Post-incident communication is also important
 - Processes and procedures to be followed.
 - Any policies updated as a result of the incident.
 - A reminder that incidents can occur at any time and to remain vigilant.
 - Who to contact if they encounter any problems with the return to business as usual.

Develop action procedures for incident notification

Incidents will be associated with one of the following impact levels: CRITICAL, VERY HIGH, HIGH, MEDIUM, LOW, or NO IMPACT, and with one of the following danger levels: CRITICAL, VERY HIGH, HIGH, MEDIUM, LOW, or NO IMPACT.

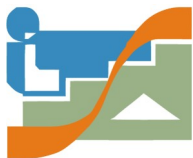

It will be mandatory to notify all those who are categorized with a CRITICAL, VERY HIGH OR HIGH level, for all those obliged subjects to whom specific regulations apply

exemple given

Real Decreto 311/2022, de 3 de mayo, por el que se regula el Esquema Nacional de Seguridad.

https://www.boe.es/diario_boe/txt.php?id=BOE-A-2022-7191

Develop action procedures for incident notification

The criteria used to determine the level of impact associated with a cyber incident take into account the following parameters:

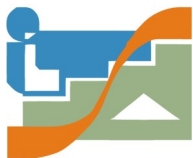

- Impact on National Security or Citizen Security.
- Effects on the provision of an essential service or critical infrastructure.
- Type of information or affected systems.
- Degree of impact on the organization's facilities.
- Possible interruption in the provision of the organization's normal service.
- Own and external time and costs until the normal operation of the facilities is restored.
- Economic losses.
- Geographical extent affected.
- Associated reputational damage

Guías CCN-STIC

Develop action procedures for incident notification

Who is obliged to report?

- AREA OF THE PUBLIC SECTOR
- AREA OF THE PRIVATE SECTOR

Where to report?

- CCN-Cert
- INITIATE

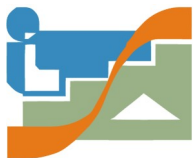

How to report?

- Single window

Why notify?

- Obligation
- System improvement
- reputation

When to notify?

Develop action procedures for incident notification

Where to report

- ccn-cert

Tool REYES: It is a solution developed by CCN-CERT to speed up the work of analysing cyber incidents and sharing cyber threat information

Tool LUCIA (Unified List of Coordination of Incidents and Threats) for those entities within the scope of the National Security Scheme

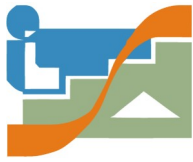

Email: (incidentes @ ccn cert cni es) For a more detailed description of the incident.

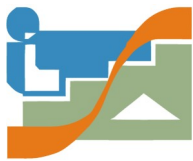

Repositorio común y estructurado de amenazas y código dañino.

Herramienta de ticketing para la gestión de incidentes de seguridad.

- **Compliance**
- **Develop action procedures for incident notification**
- **Internal incident notification**
- **Notification of incidents to whom it corresponds**

Internal incident notification

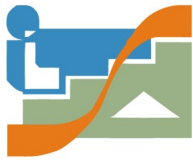

Emergency plan : **Immediately !!**

Rest of affected staff. Internal staff, suppliers and customers

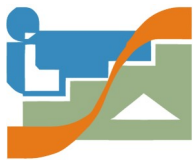

(Consider secure internal communication channels and protocols to avoid attacks)

Communicating with employees in the event of any kind of incident is important to:

- Minimise disruption
- Stop the spread of misinformation among employees.
- Ensure that employees have accurate information about the situation when communicating with customers and stakeholders. (partes interesadas)
- Provide advice on steps to keep the business running.
- Protect your revenue and reputation

- Compliance
- Develop action procedures for incident notification
- Internal incident notification
- Notification of incidents to whom it corresponds

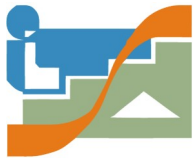

Notification of incidents to whom it corresponds

- **To all the workers**
- **To all external people who work with the company**
- **To all the people whose data has been compromised**
- **Keep lines of communication open**
- **Avoid technicalities**
- **Transparency**

Avoid reputational damage

- **Media**
- **Social networks, organization account.**

Notification of incidents to whom it corresponds

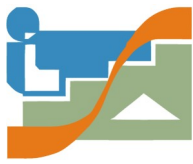

security breach

- RGPD

- All those security failures that cause the accidental or unlawful destruction, loss or alteration of personal data transmitted, stored or otherwise treated, or the unauthorized communication or access to this data

- First notification in the first 72 hours

- where? at <https://sedeagpd.gob.es/sede-electronica-web>

**We can see more information in the
Guide for the management and notification of
security breaches**
